Feedback from Respondents regarding the KyPQC and Annual Meeting

They understood the impact they can have in perinatal care using the KyPQC

They were able to engage as much as they wanted during the meeting

They were significantly more likely to say they will be more involved in KyPQC over the next year

Active involvement in the KyPQC likely to increase after meeting

"I learned how to change my language when talking about and to mothers with substance use disorder to decrease stigma."

~Attendee

Post-Meeting: Perception of substance use stigma changed

Strongly agree stigma is a major issue

"This activity reinforced my desire to educate colleagues at all provider levels about empathetic and compassionate care for substance use disorder patients."

~Attendee
