The Kentucky Perinatal Action for Concurrent Tobacco Treatment (K-PACT) Program

The Kentucky Perinatal Action for Concurrent Tobacco Treatment (K-PACT) program provides tobacco treatment training to healthcare providers and staff across Kentucky who care for women of childbearing age, including pregnant women. The program's goal is to improve the health and wellness of women and families across the commonwealth of Kentucky. Completers earn 4.0 credit hours and the K-PACT Certificate of Training. K-PACT was created by the UK Perinatal Research and Wellness Center in partnership with the Kentucky Opioid Response Effort (KORE).

The K-PACT training series includes four modules:

Module 1: Basics of Perinatal Tobacco Treatment

Module 2: Electronic Nicotine Delivery Systems and Perinatal Women, Children, and Families

Module 3: Concurrent Tobacco Treatment among Pregnant Women and Women of Childbearing Age with Substance Use Disorder

Module 4: Get Fit and Quit: A Behavioral Intervention for Tobacco Cessation

Activities

Module 1: Basics of Perinatal Tobacco Treatment

Perinatal providers and staff surveyed on the topic of perinatal tobacco treatment indicated counseling pregnant patients to cessation is important, but providers/staff lack the training and knowledge to feel confident and effective in treatment. Examples include lack of training on the 5 A's of tobacco cessation (as
